Remove Eye Make-up Without Stripping Moisture

Ultra Eye Make-up Remover 100ml • With Vitamin E and Green Tea

Finally, a professionally-developed eye make-up remover designed to remove all traces of make-up without stripping the skin of essential oils and moisture. Ultra Eye Make-up Remover works to minimise the effects of everyday pollutants on the more delicate skin around the eye.

Ultraceuticals has combined key antioxidant ingredients with the latest in product technology, ensuring Ultra Eye Make-up Remover is an effective but mild base formulation. Gentle enough for contact lens wearers, yet effective enough to remove stubborn waterproof mascara.

The easy-to-apply foaming cleanser was created to remove all traces of make-up while leaving the skin well nourished and in perfect balance due to a pH neutral formulation.

Uniquely oil-free, the water-based formulation contains Vitamin E and Green Tea to help protect the skin against damaging pollutants such as grime, debris and environment impurities.

Key Ingredients:

- Glycerin – humectant to help attract and retain moisture
- Mild cleansers (Polysorbate, Glucoside, Cocoamphodiacetate) to gently cleanse
- Green Tea extract and Vitamin E - antioxidants to help nurture and protect

Key Benefits:

- Effectively removes all traces of make-up including waterproof mascara
- pH neutral ensures the skin remains in perfect balance
- Can be used by contact lens wearers
- Antioxidants protect against damaging free radicals

With an international development team headed by leading Sydney cosmetic physician, Dr Geoffrey Heber, Ultra Eye Make-up Remover has been created specifically for use on the sensitive eye area where the skin is often thinner and requires gentle, yet effective, nourishment to firm, tone and moisturise.
